

Project Design Phase-II  
Data Flow Diagram & User Stories

<b>Date</b>	<b>16 October 2022</b>
<b>Team ID</b>	<b>PNT2022TMID20019</b>
<b>Project Name</b>	<b>Project - Real time river water monitoring and control system</b>
<b>Maximum Marks</b>	<b>4 Marks</b>

Data Flow Diagrams:

**A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.**

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
<b>Customer (Mobileuser)</b>	<b>Registration</b>	<b>USN-1</b>	<b>As a user, I can register for the application by entering my email, password, and confirming mypassword.</b>	<b>I can access my account /dashboard</b>	<b>High</b>	<b>Sprint-1</b>
		<b>USN-2</b>	<b>As a user, I will receive confirmation email once I have registered for the application</b>	<b>I can receive confirmationemail &amp; click confirm</b>	<b>High</b>	<b>Sprint-2</b>
		<b>USN-3</b>	<b>As a user, I can register for the application through Facebook</b>	<b>I can register &amp; access the dashboard with FacebookLogin</b>	<b>High</b>	<b>Sprint-1</b>
		<b>USN-4</b>	<b>As a user, I can register for the applicationthrough Gmail</b>	<b>I can register through mail</b>	<b>Medium</b>	<b>Sprint-2</b>
	<b>Login</b>	<b>USN-5</b>	<b>As a user, I can log into the application byentering email &amp; password</b>	<b>I can receive login credentials</b>	<b>High</b>	<b>Sprint-1</b>
	<b>interface</b>	<b>USN-6</b>	<b>As a User, I prefer an comparable user interface(UI),that can provide quick switch speedand is user friendly.</b>	<b>I can access it with ease</b>	<b>Medium</b>	<b>Sprint-1</b>
<b>Customer (Webuser)</b>	<b>Dashboard</b>	<b>WUSN-1</b>	<b>As a Web user, it is necessary for me to infer thequality of water by personally assure the physicaland chemical parameter of water.for that i need dynamic access to sensing parameters and WSNvalues such as pH ,dust, turbidity,temperature .</b>	<b>I can be abled to observe thevalues for quality of water</b>	<b>High</b>	<b>Sprint-1</b>
<b>Customer Care Executive</b>	<b>View manner</b>	<b>CCE-1</b>	<b>As a customer care, I can need data visualization.</b>	<b>I can understand easily viavisualization.</b>	<b>High</b>	<b>Sprint-1</b>
	<b>taste</b>	<b>CCE-2</b>	<b>As a customer care,an DBMS linked to this system is preferable for inferring about the qualityof water(presense of hardness and other salts)</b>	<b>I can easily know the presence of hardness andsalts.</b>	<b>High</b>	<b>Sprint-1</b>

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
	colour visibility	CCE-3	As a customer care, it's important for me to analyze the turbidity and shade of water(colour)	I can know the colour of water which leads to resultabout condition of water.	High	Sprint-1
Administrator	tolerance	ADMIN-1	An administrative block must take care of the system applications.	Time continuous monitoringthrough an administrator	High	Sprint-2
